“ wherein the operation of generating further comprises evaluating a measured amount of the transfer data received by the second node during the specified control interval relative to the specified received window size to determine a slope for the specified control interval; and

comparing the slope for the specified control interval against an estimate of a constant slope associated with additional available network capacity in at least one previous control interval and adjusting the receive window size for the subsequent control interval based on a result of the comparing.” (from claim 1, similar limitations in claims 17 and 33)

This subject matter is not found in the prior art nor is it obvious in view of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
